CLINICAL EXPERIENCE

After graduating from the Kasturba Medical College in Mangalore, India, I started my House Officer training which involved a three month rotation each in General Medicine, General Surgery and allied branches, Obstetrics and Gynaecology and Community Health.

I then worked as a Casualty Medical Officer in Unity Hospital Mangalore which is a 200 bedded multispeciality Hospital for a period of four months.

ORTHOPAEDIC TRAINING

IN KMC MANGALORE

My training in Orthopaedics as a Post-graduate resident involved routine ward work and exposure to the basic principles of Orthopaedic and Trauma Surgery during the first year. During the latter part of my training, I have assisted and also carried out major as well as minor Orthopaedic procedures such as internal fixation of fractures of the bones of the extremity and around the hip, external fixation, hemi arthroplasty, tendon and nerve repair and post polio corrective surgery. I have also gained exposure to the Ilizarov's technique of external fixation and to the common procedures spinal surgery. In addition the training involved running of orthopaedic and fracture clinics. During this period, I have participated in the teaching sessions of undergraduate students.

IN K.J.SOMAIYA HOSPITAL,MUMBAI

I started as Senior Registrar at the K.J.Somaiya Hospital,Mumbai. Dr.S.R.Mukhi introduced me to the principles of Joint Replacements,Arthroscopy and Spine Surgery.Working for Dr.S.R.Mukhi I had further exposure to Joint Replacements including revision surgery.

Dr.Ram Chedda introduced me to the principles of Spinal Surgery like microdiscectomy,Spinal Instrumentation and fusion.

Working with Dr.Atul Bhaskar gave me an excellent overview of paediatric orthopaedics.Dr.Atul Bhaskar who has a special interest in paediatric hip disorders gave me an opportunity to observe and perform under supervision various operative procedures for disorders of the hip.

Dr. R. H. Dhumale introduced me to various aspects of Hand and Post-Polio Corrective Surgery. I also had an insight into nerve and tendon surgery, CTEV Surgery.

I then continued my training at K. J. Somaiya Hospital and Raj Hospital working for Dr. S. R. Mukhi who had special interest in Trauma and Replacement Surgery.

I thus had a good exposure to all aspects of Trauma and Replacement Surgery.

Here I was able to extend further my operative experience to encompass a majority of elective orthopaedic and trauma operative procedures.

During this period I have carried out most major and minor orthopaedic procedures, managed outpatient clinics, medical camps and have also managed orthopaedic emergencies independently. My responsibility also included delivering lectures and conducting bedside clinics for undergraduate medical and nursing students and have also been involved in the training of CPS residents in Orthopaedics.

IN S.L.RAHEJA HOSPITAL,MUMBAI

While working in this 230 bedded multispeciality hospital one of the leading and busiest hospitals in suburbs I got the once in life time chance to work with the masters and leading names in the field of surgery.

I had the opportunity of learning the basics and principles of Diabetic Foot Surgery while working under Dr Arun Bal who is a eminent Diabetic Foot Surgeon and a visiting faculty of Amrita Institute.

Dr Sudhir Joshi one of the leading Replacement Surgeon introduced me to the Computer Assisted Navigation Surgery for knee replacements and made me a part of his surgical team and I gained immense knowledge and experience under his guidance.

Dr Abhay Narvekar a renowned Arthroscopy Surgeon in the field of Sports Medicine guided me and trained me in Arthroscopy and Arthroscopic Anterior Cruciate Ligament Reconstuction Surgery

Dr Haresh Manglani a Onco Orthopaedic Surgeon taught me the principles of Reconstruction Surgery in Bone Tumours.

SUMMARY OF EXPERIENCE

During my training,I developed a special interest in Trauma surgery,Arthroplasty, Arthroscopy and was fortunate enough to be trained in all these aspects by eminent consultants.I gained experience in modern trends in Arthroplasty such as Cementless Hip and Revision Arthroplasty.

Having thus generated a special interest in Joint Replacement and Arthroscopic surgery,I wish to specialise in these branches of Orthopaedic Surgery during my future Orthopaedic career.
